# Valley Blinds

The Valley Blinds range of curtain tracks is one of the most comprehensive available. There is a Valley Blinds track for almost every application, from the lightest of net tracks to heavy-duty corded or motorised tracks for large or heavy curtains.

The hand-drawn tracks shown here are each designed to be strong, reliable, and to give years of trouble-free use. The range comprises 12 different track profiles, all manufactured from aluminium with high-grade plastic components, and complete with a choice of sturdy and unobtrusive brackets.

Hand drawn curtain tracks, as well as being economical and simple to operate, are often the preferred option in public areas where many different persons may draw the curtains. When specifying hand drawn tracks, window size, curtain weight, usage intensity, fixing requirements and aesthetics should all be assessed, allowing the most appropriate track to be selected. The details on these pages will enable the specifier to make informed decisions with reference to these requirements, thus ensuring that Valley Blinds hand drawn curtain tracks will give optimum performance and lasting satisfaction.

Valley Blinds curtain tracks are available through a nationwide network of distributors / customers, with experienced installation and service teams providing an unrivalled level of support.

## Maintenance

All Valley Blinds hand drawn curtain tracks are designed to require little or no maintenance. The tracks and components are made from durable materials that will not corrode in normal use. In the event of damage most components are replaceable. Tracks with gliders may be lubricated occasionally with a sparing application of silicone to retain sliding efficiency. Tracks with roller runners should not be lubricated. Spare parts may be obtained from the manufacturers.

Valley Blinds electric tracks represent the ultimate in curtain control. Not only do they lend support to an ambience of success and luxury, they are also eminently practical. At the touch of a button they will glide into action, smoothly, quietly, and with an effortless power that ensures lasting satisfaction. A large range of control systems is available, from a simple wall switch to radio remote handsets, or even complete integration into intelligent building control.

The electric tracks shown here are designed for strength and reliability, and will give years of trouble-free use. They are all manufactured from aluminium, with high-grade plastic components and sturdy, unobtrusive brackets. When selecting a track, window size, curtain weight, usage intensity, fixing requirements and aesthetics should all be assessed, allowing the most appropriate track to be specified.

Valley Blinds curtain tracks are available through a nationwide network of distributors / customers, with experienced installation and service teams providing an unrivalled level of support.
